

Architecture Design around your business needs

SUMMARY

Reduce complexity, and minimise risks in security and rights management

Design new environments, and easily consolidate and migrate existing environments

Optimise Group Policy for effective management of users and devices according to company policies

FEATURES

Security is integrated through logon, and access is controlled using a single logon for File Shares, Printers and Applications anywhere in the network

A global catalogue of services and objects provides a view of your entire environment

Policy-based segmentation of assets for central and de-centralised access and control

THE VIADEX ACTIVE DIRECTORY HEALTH CHECK IS IDEAL FOR:

Organisations that need a secure infrastructure due to rapid growth or multiple locations with de-centralised IT command and control

Organisations with growing risk and compliance requirements

Organisations preparing to move to Public Cloud services, seeking to ensure their infrastructure is ready.

Viadex can address any configuration requirements for any type or size of business; assessing the best approach for your business needs, considering your goals and likely future requirements.

We specialise in designing the most appropriate Active Directory architecture to meet each customer's unique requirements.

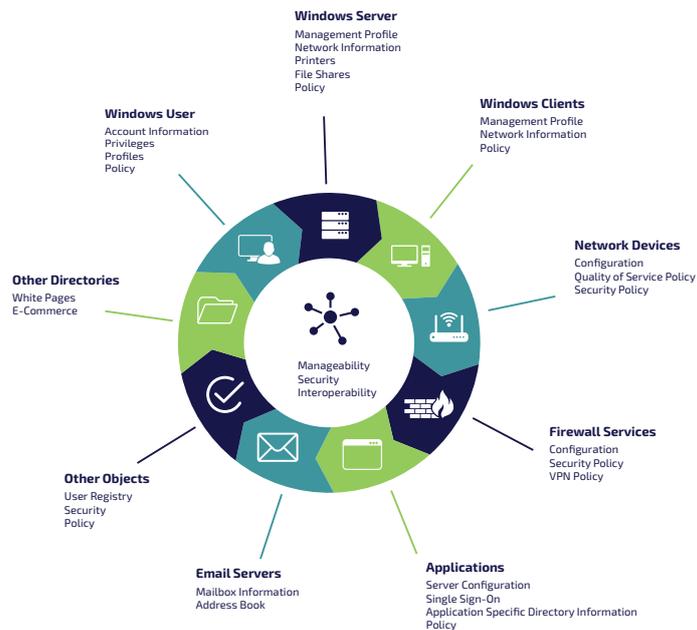

THE SOLUTION

The Viadex Consulting and Professional Services team brings the skills and experience to rapidly assess, design and deploy your Microsoft Active Directory and Azure Active Directory solutions.

THE COMPREHENSIVE WAY TO MANAGE A SECURE IT ENVIRONMENT

A Disaster Recovery strategy is also tested as part of the service we deliver. We'll manage the installation of your project from end to end, including robust Business Continuity plans to ensure that your Active Directory is resilient and highly available.

The Active Directory Domain contains objects including users and devices with policies deployed to control what and how they can access resources and applications.

Computer and User configurations are controlled through Group Policies deployed and replicated throughout the environment. These include the access to all types of services available – file shares, printers, network devices, business applications and IT services – on-premise or in the cloud.

Active Directory Health Check

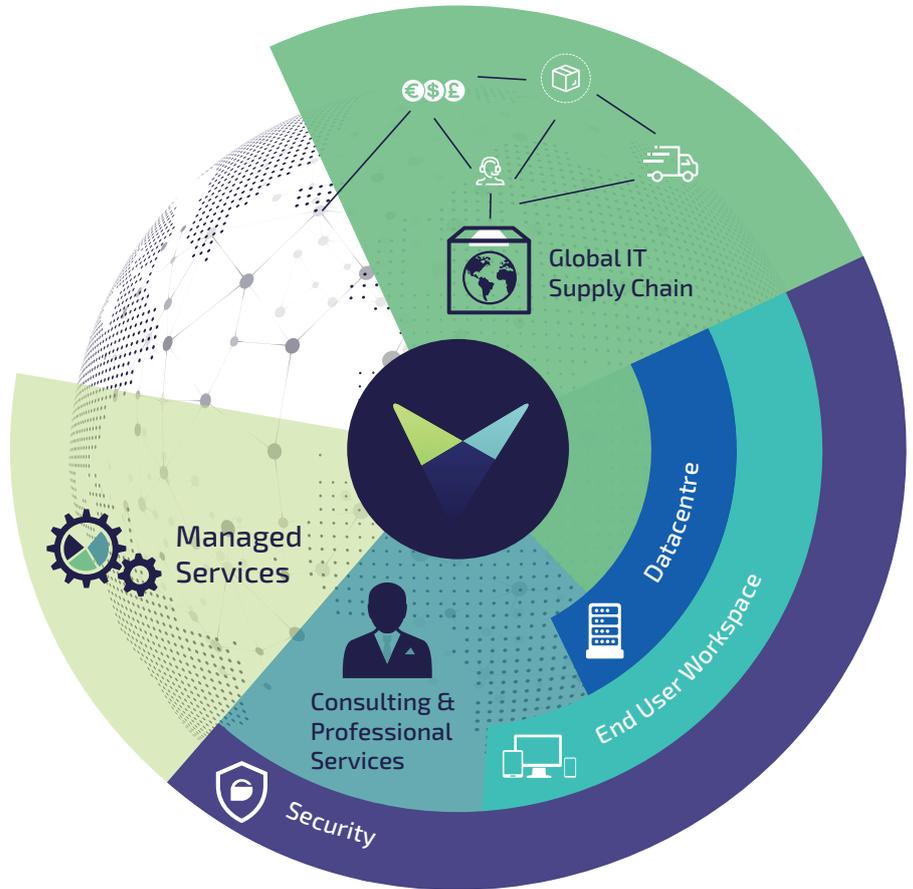

About Viadex

Experience: Viadex work with best-in-class global partners to deliver tried and tested approaches and engagement models, following a robust framework approach to ensure justifiable outcomes and reduce project risks.

Direction: In an increasingly competitive environment, a 'one size fits all' approach to IT rarely addresses your objectives: reducing risk, reducing costs or improving efficiencies.

Precision: Our structured methodology analyses your current mode of operation (CMO) to best define the scope of the IT solution, aligned to the needs of the business now and into the future.

Focus: Viadex provide tactical and strategic IT direction to help focus on your current and future business goals and long-term strategy.

Global Logistics

By partnering with our customers, we handle the process of manufacturer evaluation and selection, commercial negotiations and global support to make sure the technology solutions meet the necessary business requirements.

The Viadex Global Logistics Service helps you create an infrastructure that is agile enough to adapt and grow with you across the globe. The entire team work across all International time zones, no matter where you are based, offering a 24/7 emergency worldwide response.

Consulting and Professional Services

An agile infrastructure designed to service end-user experience is both critical and indispensable in today's world.

Viadex Consulting and Professional Services follow our core methodology of Audit, Design, Deploy and Optimise, to help transform your infrastructure to directly support your business productivity goals and enhance end-user experience.

Managed Services

Viadex has the global capability to provide a wide range of Managed Service solutions to help organisations with the operation of their technology environments.

Viadex provide 24x7x365 technical expertise, service consistency and flexibility across multiple vendors, technologies and geographies.

Every service is wrapped into our Global IT Service Desk, using IT Service Management and ITIL aligned frameworks, detailing set processes supported by highly skilled and trained people.
