

Office 365 Backup as a Service (O365BaaS)

Viadex MSP specialise in supporting mid-market organisations to grow globally, at speed, safely.

Has your data protection fallen between the cracks for Office 365?

Office 365 & SaaS applications have brought tremendous benefits but is your data protection now unfit for purpose?

The migration to software as a service applications such as Microsoft Office365 has seen huge benefits for many IT Teams and their users. Applications available anywhere, anytime, commercial models moved to opex consumption, easy upgrades and updates are some of the benefits.

However, not every element of managing the application is included and for many organisations, **data protection has been overlooked.**

In the case of Office365, data protection is still the primary responsibility of the customer. Not everybody knows this.

Microsoft support the application and infrastructure uptime but do not protect from data loss.

In the traditional on-prem environment, IT looked after this. Migrating to cloud means it may fall between the cracks of IT and the vendor.

Viadex offer a simple way to regain control and protect your data, globally.

Eliminate Data Loss – Complete backup & recovery.

Viadex provide global data protection with iland Secure Cloud Backup. Our as-a-Service solution provides complete backup and recovery for your Office 365 data including Exchange Online, SharePoint Online and OneDrive for Business.

Your Office 365 data is backed up daily to iland's secure cloud. Data sovereignty and geographic redundancy is achieved with 10 global datacentres.

- 100% Uptime SLA
- Included 24/7/365 Customer Support
- Stringent compliance and security posture – HIPAA, SOC2, ISO 27001, GDPR, Cloud Security Alliance STAR Gold Certification and more
- Complete Cloud Services portfolio (Backup, Disaster Recovery, IaaS,)

Viadex support your growth

Viadex are a global MSP. Our backup service is designed for organisations with dispersed user bases who need a local service, globally and want to free themselves from tasks which are critical but also classed as "Business as usual" and "keeping the lights on". We work in partnership with IT teams who want a technology partner to help them align and exploit their IT strategy and free up their people to focus their time on better business outcomes.
