

# Viadex MSP 0365 Governance Service

Microsoft Office 365 is intrinsically linked to your business activity and data. It needs to be configured, monitored and maintained to avoid and detect breaches, data leaks and internal threats.

Unfortunately, many organisations lack the time & know-how to achieve this continuously while also running their business. Viadex MSP delivers a unified and continuous Office 365 security posture service that helps organisations to achieve this immediately.

## Viadex deliver best practice security for O365

Viadex tailor security configurations to fit your organisation's unique needs. Secure users, mailboxes, Exchange, AzureAD, Teams, SharePoint, Intune and everything 365.

Secure your business quickly and maintain affordably

Deliver corporate wide O365 security best practice with confidence

Improve Office 365 security rapidly

Achieve a security posture that fits your activities and lets you get back to your business

# Why Viadex MSP O365 Governance Service

We have recognise a problem that is going unsolved, which is that O365 is a business critical SaaS solution that cannot risk the gaps that traditional security tools leave. There are many great security features in Office 365, however maintaining a coherent security posture, whether you use these tools or not, requires constant attention, diligence, and knowledge.

Viadex MSP helps organisations to achieve continuous and coherent security best practice with a service that is affordable and easily deployed. Combining Viadex Global Service Desk and powerful SaaS cloud security tools, we provide visibility, monitoring and management of configuration gaps, activity and breaches.

We free your IT team up to focus on the business activities.

## Benefits

Achieve CIS benchmark for O365 security. Doing this internally usually takes a great deal longer and under resourced IT teams struggle to stay on top of it as effectively as we can

Rapid deployment to realise the benefits immediately.

Viadex Global Service Desk Support with powerful Cloud SaaS tools to ensure continuous compliance

Security Posture as a Service; continuous monitoring ensures correct configuration through continuous business and employee activity

Value for money; leveraging Viadex skill and tools to achieve best practice which is affordable
