

By 2024, the value of regulated online gaming in the US is forecast to reach at least \$23 billion.

Viadex has built a regulatory and technology blueprint to make sure our online gaming customers can enter regulated markets as quickly as possible. Through our experience in gaming regulation and infrastructure, our team can assist through the full lifecycle of entering a regulated market.

The Viadex service portfolio will allow you to achieve and overcome the following:

Compliance with legislation and regulations

Finding regulated data center space in an unknown region

Scoping appropriate technologies for potentially unknown workloads

Procuring and delivering technology solutions into regions with varying import and VAT costs

Installing the technology into a remote location

Upgrading infrastructure as your business grows to keep delivering the best customer experience

Adjusting quickly to customer needs and the competitive landscape

With Viadex's reliable procurement, logistics and managed services engine, you can access the right markets, at the right time within regulation. We'll equip you with the tools you need to attract, retain and expand your customer base.
