## Do You Want To Optimise Your Technology And Your Budget?

Every organisation needs a smart, cost-effective and capable IT infrastructure. You want tools that allow you to adopt the right portfolio of products over time but within your budget and at your speed.

The benefits of technology are obvious but finding a way of seeing these benefits – that’s the challenge.

This is where the Viadex F.R.A.M.E -Framework, Roadmap, Adoption, Measurable Value and Enablement methodology delivers.

*Do you want an easy way to manage your IT estate while ensuring your technology investments are relevant and up-to date.*

A monthly recurring fee that aligns with investment and budgets

Access to an agile and flexible portfolio of products integrated over time at a controlled pace

Enhanced security and compliance

A fully optimised IT estate developed in line with strategy and business needs

Consulting &  
Professional  
Services

## Technology: Unlocked.

If your organisation has recently undertaken a merger or acquisition process, F.R.A.M.E helps you consolidate or split your IT estates to ensure a seamless transition & integration.

If your IT teams are overstretched, struggling with resourcing and skills, and lack the time needed to optimise your IT estate, F.R.A.M.E provides you with the right levels of support.

## Optimise Your IT estate

If your organisation has recently undertaken a merger or acquisition process, F.R.A.M.E helps you consolidate or split your IT estates to ensure a seamless transition & integration.

If your IT teams are overstretched, struggling with resourcing and skills, and lack the time needed to optimise your IT estate, F.R.A.M.E provides you with the right levels of support.

## F.R.A.M.E Your IT Estate

F.R.A.M.E is designed to provide you with access to solutions that fit your business without the hefty upfront costs. And if you want to see actual value from existing, underused investments, F.R.A.M.E maximises their value.

You streamline and optimise your IT estate, reducing redundant or underused software. You enhance your cybersecurity posture and ensure compliance. You maximise the value of your existing tools.

You don't get any surprises. You pay a set fee every month over a specific period of time – shifting your expenditure from CAPEX to OPEX – while benefitting from a consistent evolution of your IT estate.

There is one surprise, but it's a good one: you don't have to circle the call centre in search of support. You get one dedicated specialist who provides you with constant support and insights.

Proven rapid value  
and improved  
efficiencies

A collaborative  
approach with a  
dedicated  
consultant

License and cost  
optimisation

## ABOUT VIADEX

Viadex combines global expertise with local knowledge to deliver customised, cost-effective IT solutions. Understanding that every business has unique challenges and goals, Viadex takes an end to-end approach to tailor solutions that align perfectly with your objectives and operational needs.

With Viadex, IT is never one-size-fits-all – it’s designed specifically for you.

**Smart Sourcing** - Our local expertise combined with global efficiency helps us source the technology you need, at the right time, cost, and location. This ensures seamless delivery and compliance wherever your business operates.

**Seamless Deployment** - We can deploy and install your IT solutions, as our aim is to have every project delivered smoothly and integrated flawlessly into your systems.

**Ongoing Support** - Our job doesn’t stop after deployment. We provide you with ongoing support, monitoring, and updates to keep your IT department performing at its best.
